

EMPOWERING TODAY'S VISION FOR A BRIGHTER TOMORROW

Unique Entity ID: H7SHG3YW2TX8 CAGE/NCAGE: 9SRV7

CAPABILITY STATEMENT

CORE COMPETENCIES

Networking Milestones is a Florida-certified electrical contractor specializing in structured cabling solutions, including fiber optics, CAT6, and low-voltage data cabling. Minority-owned and proudly serving the state since 2018, we bring over seven years of business experience as a company and 25 years of combined industry experience delivering reliable, code-compliant infrastructure that powers today's connected environments.

You may be in need of a company:

- Responsive service with attention to detail from start to finish
- Strong focus on workmanship, reliability, and customer satisfaction
- Responsive service with a personal commitment to excellence

Our team is highly trained for the following services:

- Structured cabling design & installation
- Low-voltage electrical systems
- Cable management & labeling standards compliance
- Moves, adds, and changes (MAC) services
- Code-compliant installations
- Troubleshooting of Copper and Optical Fiber cables
- Server room and rack setup
- Cable Certification
- Bonding and Grounding of Telecommunications systems

PAST PERFORMANCE

AMTRAK (2025)

– Assisted in installation of Cat6 network cables to support existing security camera locations, ensuring reliable connectivity and improved surveillance infrastructure.

Camp Lejeune Marine Corps Base (2024) – Supported the installation and operation of a paging system at an elementary school, improving campus-wide communication and safety.)

UNC Health (2022 - 2024)

– Assisted with a rack relocate copper and fiber installation, splice and network assessment of various sites throughout the state of NC.

NC A&T State University (2024) – Assisted with the removal of outdated wireless access points and installation of upgraded wireless APs, enhancing campus-wide connectivity and performance.

Switch Atlanta (DELL) (2022) – Assisted in installation of servers and network switches, strengthening data center performance and enterprise-level infrastructure.

CERTIFICATIONS

- **Licensed Contractor, Florida (2023 – Present)** – Authorized to perform electrical and low-voltage contracting work in the state of Florida.
- **Florida Certified, Minority-Owned Contractor** – Recognized supplier for state and government projects.
- **BICSI Corporate Member** – Upholding global ICT industry standards in every project.
- **OSHA 30 Certified (Leadership)** – Safety-trained leadership team ensures job site compliance.
- **OSHA 10 Certified (Technicians)** – All field technicians trained in essential workplace safety.
- **OCC Certified Installer** – Certified by Optical Cable Corporation for fiber optic solutions and structured cabling systems.

SYSTEMS

- **Structured Cabling Systems** - Cat6/Cat6a copper cabling. Patch panels, racks, and cable management.
- **Fiber Optic Systems**
- **Security & Surveillance Systems**
- **Audio/Visual (A/V) Systems**
- **Wireless & Network Systems**
